

## **Mr bouncy Castle Ltd and safety policy 2019**

### **Health and Safety Policy**

#### **Statement**

Our company's prime responsibility is the safety of our customers and employees.

#### **Equipment**

All of our equipment is tested annually to ensure that it complies with the latest standard. BS EN 14960. The test certificates are available on our P1 website and each inflatable has a PIPA tag to show that it has been tested within the last 12 months.

All of our electrical equipment is PAT tested independently every 12 months.

#### **Training**

All of our employees have to undergo at least 10 hours of on-the-job training. They must demonstrate a deep understanding of the health and safety processes detailed in our method statement.

Our staff are also made to sign an agreement stating their understanding of their duty of care to the customer's the public and other employees and to comply with our method statement regarding set up at all times.

Periodic spot checks are made of their set up to ensure that they are being done correctly.

#### **Customer Responsibility**

We encourage our customers to perform their own health and safety assessment of our equipment and set up. We provide risk assessments and method statements on our website. We also provide every customer with a health and safety flyer which states the most important elements of health and safety. Including supervision and monitoring weather conditions.
